

# The New Standard for Centers of Excellence

We connect employers directly with top healthcare providers offering bundled rates on surgeries (covering conditions such as musculoskeletal, cardiac, and bariatric) and cancer care. Complete care coordination is delivered through a digital patient app that is designed to enhance human support and COE collaboration, along with a dedicated patient care team that takes the guesswork out of medical administration, resulting in a more meaningful member experience.

## The Carrum Health Difference

### The right care from the best providers

We evaluate doctors and facilities on dozens of success metrics and only partner with the top 10% across the nation. Our uncompromising focus on quality means each patient gets the care they need, along with a warranty on every bundle that drives accountability and better outcomes.

### Predictable and immediate cost savings

We incentivize delivering more appropriate care, helping avoid unnecessary and costly procedures and treatments. We fully bundle all of the services a patient needs (e.g. facility, provider and treatment fees) into one, upfront payment, providing immediate return on investment and most, if not all, costs are covered for members.

### Proven cancer treatment bundles

We are the first and only proven approach to bundling all aspects of treatment for high-prevalence cancers, including expert advisory reviews, evidence-based treatment plans and appropriate treatments, including: surgery, systemic and radiation therapies, along with symptom management and follow-up care. Members in remote areas can access world-class cancer care through our virtual cancer guidance programs.
