

Calibrate

# THE PIONEERS OF COMPREHENSIVE OBESITY TREATMENT

**Calibrate is the leading clinician-guided and value-based model in medication-enhanced obesity treatment.**

We are expanding access to care by working directly with employers and payers so that more members can achieve sustainable, life-changing results that lead to healthier lives.

## Bridging the gap between holistic care and the right medications

Developed by renowned clinicians, our program optimizes access to GLP-1 medications such as Wegovy® and Zepbound® combined with behavior change interventions on an easy-to-use mobile app. **We clinically stratify populations to contain GLP-1 use and drive adherence so the investment isn't wasted.**

# How Calibrate Works

Calibrate improves metabolic health using the right combination of tools that keep engagement high and improve outcomes.

“

We continue to be thrilled with the amazing excitement around the Calibrate program. **Those on the program have lost over 5,400 pounds while maintaining a stellar 5 out of 5-star rating** since we implemented January, 2023.

**...It's clear that Calibrate stands head and shoulders above the rest,** making them an indispensable partner in achieving our goals.

★★★★★ 5/5 RATING

## Why Calibrate

**At Calibrate, we firmly believe that medication serves as a vital tool in achieving health objectives but should never be viewed as a standalone treatment or solution.** Instead, it is an integral component of a comprehensive strategy aimed at optimizing health and well-being. Calibrate stands at the forefront, offering the premier solution for obesity treatment. Our pioneering program integrates medication, specifically GLP-1s, with a holistic metabolic health approach.

**This innovative combination is meticulously crafted and scientifically validated to deliver sustainable, long-term results for our members while simultaneously broadening access to essential care.**
